Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Community Arithmetic Most modern textbooks in arithmetic contain a logical development of processes as well as excellent drills. The authors long experience, however, has impressed on him the fact that the greatest difficulty encountered by teachers consists in providing suitable applications for the processes taught - applications which give the pupils a clear understanding of industrial and business activities that have an arithmetical basis. This is a book of applications to be placed in the hands of pupils in the upper grades of the Elementary School or in the Junior High School. Neither teachers nor pupils require a first-hand knowledge of the lines of business or industry studied, as the lessons furnish the necessary information and explain how the processes apply. The lessons show the community needs and develop the processes as the needs arise. Many lines of work common to the average large town and based on arithmetical processes are represented in these lessons. Enough pages have been devoted to each subject to secure an intelligent understanding of the business or industry as well as to show how the processes apply. The lessons in the first part of the book require a knowledge of fundamental operations only. Later lessons involve common and decimal fractions, the most commonly used facts of the denominate number tables, and percentage and interest. The author has constantly kept in mind the facts that most pupils are to become wage earners, that all should become producers, that industry is founded on economy of material, and that the success of the individual depends largely on economy in his expenditures and wise investment of his savings.
