The expression automatic train control, as herein used, is understood to mean, a block signal system in combination with appliances which work in accordance with the signals, and afford complete automatic protection against; - errors in the despatching system, errors of the enginemen, and failures of the signals to operate properly. Summarily, it guards against all errors human or inanimate and permits trains to move only when it is safe for them to do so. The principles of the system only as redesigned for commercial use will be dealt with. These reconstructed plans are the result of...

## Reviews

*A very amazing publication with perfect and lucid information. We have read through and that i am certain that i will planning to study once more yet again in the future. You will not really feel monotony at anytime of the time (that's what catalogues are for about should you question me).*
