Perspectives and outlooks morph into unpredictable mental images, as time and space (spatio-temporal) fluctuate. Major shift in a mans vision accompanies the aftermath of experiential picture-frames. The assembling of tomographic cross sections of an individuals impressions may even result in philosophical transactions. The poems in this collection, arranged in a reverse order in the alphabetical sense, exemplify the fusion of personal practices with professional and general ethical constructs. The thoughts, which pass through an emotional roller coaster, may not always be generated systematically. But the underlining unification of universal ideas emerges with obvious undertones.
